

A technical line drawing of a pulley. It features a central shaft hole, a wide flange with a beveled outer edge, and a smaller flange on the opposite side. The drawing is oriented diagonally.

WFB 32-20

A technical drawing of a bolt head and nut assembly. The bolt head is on the left, showing a hexagonal shape with a central circular hole. The nut is on the right, showing a hexagonal shape with a central circular hole. The drawing is a line drawing with no shading.

WFB 32-20

WFB 32-20

A technical line drawing of a pulley. It features a central shaft hole, a wide flange with a beveled outer edge, and a smaller cylindrical section at the back. The drawing is oriented at an angle, showing the top and side profiles.

WFB 32-20

A technical drawing of a bolt head and nut assembly. The bolt head is shown in a perspective view, featuring a hexagonal shape with a central circular hole. The nut is shown in a side view, appearing as a cylindrical component with a hexagonal base and a threaded section.

WFB 32-20

A technical drawing of a bolt head and nut assembly. The bolt head is shown in perspective, with a hexagonal shape and a central circular hole. The nut is shown in perspective, with a hexagonal shape and a central circular hole. The bolt is shown in perspective, with a hexagonal head and a threaded shaft. The nut is shown in perspective, with a hexagonal head and a threaded shaft. The bolt and nut are shown in perspective, with the bolt head and nut head facing each other.

WFB 32-20

WFB 32-20

A technical line drawing of a pulley. It features a central shaft hole, a wide flange with a smooth outer rim, and a series of concentric circles representing the pulley's profile. The drawing is oriented at an angle, showing the top and side of the component.

WFB 32-20

A technical drawing of a bolt head and nut assembly. The bolt head is on the left, showing a hexagonal shape with a central circular hole. The nut is on the right, showing a hexagonal shape with a central circular hole. The drawing is a line drawing with no shading.

WFB 32-20

A technical line drawing of a pulley. It features a central circular hole for a shaft, surrounded by a flat circular face. The outer edge of the pulley has a V-shaped groove for a belt. A small rectangular feature, possibly a keyway or a mounting tab, is visible on the side of the pulley's body.
