The image shows a technical drawing of a bolt head and nut assembly. The bolt head is a hexagonal shape with a central circular hole. The nut is a hexagonal shape with a central circular hole. The bolt head is shown in a perspective view, and the nut is shown in a side view. The bolt head is labeled with the number 10046170.

10046170

A technical line drawing of a cylindrical component. The component has a main cylindrical body with a smaller diameter section at one end. This smaller section features a threaded surface. On the side of the main body, there are three small circular features. At the front of the main body, there is a larger circular feature with a small, irregular shape inside it.

10046170

The drawing shows a cylindrical part with a flange on the left. The flange has a central hole and three smaller holes around its perimeter. The main body of the cylinder has a threaded section on the right, indicated by a series of parallel lines.

VDI 40

10046170

A technical line drawing of a cylindrical metal component. The part has a main body with a central hole and three small holes around its circumference. One end of the cylinder is threaded, while the other is smooth.

INDEX

VDI 40

10046170

A technical drawing of a cylindrical metal part. It features a central threaded section on the right side. The main body is a cylinder with a flange on the left. The flange has four small holes around its perimeter and a larger central hole. A small 'Q' mark is visible on the flange's outer edge.

INDEX

VDI 40

10046170

A technical drawing of a cylindrical component. The left end features a large central hole and a smaller hole on the outer edge. The right end is threaded. The part is labeled with the number 10046170.
