

A technical drawing of a shaft-hub assembly. The shaft is a long cylinder with a hole through its center. The hub is a shorter cylinder with a central bore. A wedge-shaped lock is inserted into a slot in the shaft, wedging it against the inner bore of the hub to secure the assembly.

3/4"

3/4"

Technical drawing of a mechanical component, likely a valve or actuator. The drawing shows a cross-section of the component, revealing internal features such as a central bore and a smaller internal hole. The component has a cylindrical body with a flange or mounting surface on one end. A small circular feature, possibly a screw head or a pin, is visible on the side of the flange. The drawing is a line drawing with no shading.

3/4"

3/4"

The drawing shows a mechanical component, possibly a valve or actuator. It features a cylindrical body with a flange on the left side. A central shaft or rod extends from the right side. The flange has a central circular opening and a smaller, offset circular feature. The shaft has a small circular hole near its base. The drawing is a technical line drawing with no shading or color.

3/4"

The drawing shows a mechanical component, possibly a valve or actuator. It consists of a cylindrical body with a flange on one end and a long, thin rod extending from the other. The flange has a central circular opening and a smaller, offset circular feature. The rod has a small circular hole near its base. The drawing is a technical illustration, likely a cross-section or a side view, showing the internal structure and dimensions of the component.

3/4"

The drawing shows a mechanical component, possibly a valve or actuator. It features a cylindrical body with a flange on the left side. A central shaft or rod extends from the right side. The flange has a central circular opening and a smaller, offset circular feature. The shaft has a small, rectangular slot or notch near the flange. The drawing is a technical line drawing, showing the component's geometry and assembly details.

3/4"

The drawing shows a mechanical component, possibly a valve or actuator. It features a cylindrical body with a flange on the left side. A central shaft or rod extends from the right side. The flange has a circular opening in the center and a small, circular feature on its outer edge. The shaft has a small, circular feature near its base. The drawing is a technical illustration, likely a cross-section or a side view, showing the internal structure and components of the device.

3/4"

Technical drawing of a mechanical component, likely a valve or actuator. The drawing shows a cross-section of the component, revealing internal features such as a central bore and a smaller internal hole. The component has a cylindrical body with a flange on one end and a threaded section on the other. A small circular feature, possibly a screw or a pin, is visible on the side of the flange.
