

Rundprisma

This diagram shows an exploded view of a mechanical assembly. It includes a main housing with a circular opening, a central shaft with a pulley, and a bracket that fits into the housing. The components are shown in their relative positions to illustrate how they fit together.

Rundprisma

This diagram shows an exploded view of a motor assembly. The components are arranged to show their relative positions: the motor housing at the top, the stator in the middle, the rotor at the bottom, and the fan at the very bottom. The rotor is shown with its cooling fins and a central shaft. The fan is shown with its blades and a central hub. The stator is shown with its windings and a central shaft. The motor housing is shown with its mounting flange and a central shaft. The diagram is a technical line drawing with no shading.

This diagram shows an exploded view of a motor assembly. The components are arranged to show their relative positions: the motor housing at the top, the stator in the middle, the rotor at the bottom, and the fan at the very bottom. The rotor is shown with its cooling fins and a central shaft. The fan is shown with its blades and a central hub. The stator is shown with its windings and a central shaft. The motor housing is shown with its mounting feet and a central shaft. The diagram is a technical line drawing with no shading.

Rundprisma

This diagram shows an exploded view of a motor assembly. The components are arranged to show their relative positions and assembly sequence. From left to right, the components are: the motor housing (a large, rectangular, cast metal part), the stator (a cylindrical component with cooling fins), the rotor (a cylindrical component with a central shaft), and the fan (a three-bladed component mounted on the end of the rotor shaft). The diagram is a technical line drawing with no shading.
