

A technical line drawing of a cylindrical mechanical component. The component features a central longitudinal slot that runs the length of the cylinder. At one end, there is a flange or a series of radial ribs. The drawing is a perspective view, showing the internal structure of the slot and the external profile of the cylinder.

ER-Spannzange

The drawing shows a cylindrical part with a central longitudinal slot. A cross-section view is provided on the left, showing the internal structure of the slot and the surrounding material. The slot is wider at the top and tapers slightly towards the bottom. The cross-section view shows the slot is formed by two curved surfaces meeting at a central point, with a small gap between them. The outer surface of the cylinder is smooth, and the inner surface of the slot is also smooth. The drawing is a line drawing with no shading.
