

A technical line drawing of a ball bearing assembly. It features a cross-shaped handle on the left, a central ball bearing, and a square nut on the right. The nut has a circular feature on its face, possibly a screw or a pin.

## INDEX CAPTO C3

A technical line drawing of a mechanical assembly. It features a cylindrical component with a flange. A cross-shaped component is attached to the left side of the flange, and a square component is attached to the right side of the flange. The square component has a circular feature on its face.

INDEX CAPTO C3

INDEX CAPTO C3

INDEX CAPTO C3

A technical line drawing of a mechanical assembly. It features a cylindrical component with a cross-shaped handle on the left and a square nut on the right. A ball bearing is positioned between the handle and the nut, with a small rectangular block (likely a spacer or shim) placed between the handle and the bearing.

INDEX CAPTO C3

A technical line drawing of a ball bearing assembly. It features a cross-shaped handle on the left, a central ball bearing, and a square nut on the right. The nut has a circular feature in the center of its face.

INDEX CAPTO C3

INDEX CAPTO C3

INDEX CAPTO C3

A technical line drawing of a mechanical assembly. It features a ball bearing with a cross-shaped component (likely a cross roller) mounted on its inner ring. A small square component is also visible on the outer ring of the bearing.

## INDEX CAPTO C3

A technical line drawing of a mechanical assembly. It features a cylindrical component with a flange on the right. A cross-shaped component is mounted on the left side of the cylinder. A small square component with a circular feature is positioned between the cross-shaped component and the cylinder. A ball bearing is shown between the cross-shaped component and the square component.

INDEX CAPTO C3

INDEX CAPTO C3

A technical line drawing of a mechanical component, likely a handle or a knob. It features a central cross-shaped handle with a square base. A circular disc is attached to the back of the handle, and a small square component is visible on the side of the disc.

INDEX CAPTO C3

INDEX CAPTO C3

A technical line drawing of a ball bearing. The bearing is shown in a perspective view, highlighting its cylindrical shape and the flanges at each end. On the left flange, there is a cross-shaped feature. On the right flange, there is a square feature with a circular hole in the center.
