

A technical line drawing of a cylindrical mechanical component. The component features a central longitudinal slot that runs the length of the cylinder. At one end, there is a flange or a series of radial ribs. The drawing is a perspective view, showing the internal structure of the slot and the external profile of the cylinder.

ER-Spannzange

ER-Spannzange

ER-Spannzange

A perspective view of a cylindrical shell. A longitudinal crack is shown as a line running along the length of the cylinder. A circumferential crack is shown as a line wrapping around the cylinder's circumference.

ER-Spannzange

A perspective view of a cylindrical shell, showing its curved surface and a longitudinal crack running along its length.

ER-Spannzange

ER-Spannzange

ER-Spannzange

A technical line drawing of a tapered roller bearing in cross-section. The drawing shows the outer ring, inner ring, and several tapered rollers held together by a cage. The rollers are tapered, being wider at one end than the other, and are arranged in a circular pattern. The cage is visible between the rollers, and the inner and outer rings are shown as concentric cylinders with internal features.

ER-Spannzange

A perspective view of a cylindrical shell. A longitudinal crack is shown as a line running along the length of the cylinder. A circumferential crack is shown as a line running around the circumference of the cylinder.

ER-Spannzange

A technical drawing of a cylindrical component, likely a part of a mechanical assembly. It features a central longitudinal slot and a flange at one end. The drawing is a perspective view showing the internal structure and the flange.
