

WFB 32-20

WFB 32-20

A technical drawing of a mechanical component, likely a cross-shaped shaft or a specialized coupling. It features a central shaft with a cross-shaped end view. The shaft is surrounded by a circular flange or housing. The drawing shows various internal and external features, including a central hole, a cross-shaped cutout, and a circular flange with a central hole. The drawing is a line drawing with no shading.

WFB 32-20

A technical drawing of a mechanical component, likely a cross-shaped shaft or a specialized coupling. It features a central shaft with a cross-shaped end on the left and a flange with four mounting holes on the right. The drawing is a perspective view showing the component's three-dimensional structure.

WFB 32-20

WFB 32-20

The image shows a technical drawing of a mechanical component, possibly a valve or actuator. It features a central body with a cross-shaped handle on the left and a threaded rod or stem extending from the right. The drawing is a line art representation, showing the internal structure and external features of the component.

WFB 32-20

A technical line drawing of a mechanical component, likely a valve handle. It features a central cross-shaped handle with a circular base. The base has a flange with four mounting points. A threaded stem extends from the center of the handle.

WFB 32-20

WFB 32-20

WFB 32-20

The image shows a technical drawing of a mechanical component, possibly a valve or actuator. It consists of a main cylindrical body with a flange on the left side. A cross-shaped handle or actuator is attached to the front of the flange. The drawing is a line drawing with no shading, showing the geometry of the part.

WFB 32-20

A technical drawing of a mechanical component, likely a cross-shaped shaft or a specialized coupling. It features a central shaft with a cross-shaped end. The shaft is surrounded by a circular flange or housing. The drawing shows the component from a perspective view, highlighting its symmetrical design and the various surfaces and edges.

WFB 32-20

A technical drawing of a mechanical component, likely a cross-shaped shaft or a specialized coupling. It features a central shaft with a cross-shaped end on the left and a flange with a central hole on the right. The flange has a circular face with a central circular opening and a smaller circular feature on the right side. The component is shown in a perspective view.

WFB 32-20

WFB 32-20

WFB 32-20

A technical line drawing of a mechanical assembly. It features a central cross-shaped handle with four rounded ends. This handle is mounted on a circular base plate. The base plate has a central hub with a small circular feature. A threaded stem extends from the center of the base plate. A small rectangular component is attached to the side of the base plate, and a small circular feature is visible on the stem.

WFB 32-20

A technical drawing of a mechanical component, likely a cross-shaped shaft or a specialized coupling. It features a central shaft with a cross-shaped end, a flange with four bolt holes, and a threaded section on the right side.
