

A technical drawing of a shaft-hub assembly. The shaft is a long cylinder with a hole through its center. It is inserted into a hub, which has a central bore. A wedge-shaped lock is positioned between the shaft and the hub, secured by a screw. The drawing shows the assembly from a perspective view, highlighting the wedge and the locking mechanism.

3/4"

Technical drawing of a mechanical component, likely a valve or actuator. The drawing shows a cross-section of the component, revealing internal features such as a central bore and a smaller internal hole. The component has a cylindrical body with a flange or mounting bracket on one end. The drawing is a line drawing, showing the geometry of the part.

3/4"

3/4"

The drawing shows a mechanical component, possibly a valve or actuator. It consists of a cylindrical body with a flange on one end and a long, thin rod extending from the other. The flange has a central circular opening and a small, rectangular slot. The rod has a small circular hole near its base. The drawing is a technical illustration, likely a cross-section or a side view, showing the internal structure and dimensions of the component.

3/4"

The image shows a technical drawing of a mechanical component, possibly a valve or actuator. It consists of a cylindrical body with a flange on one end and a long, thin rod or stem extending from the other. The flange has a central circular opening and a smaller, offset circular feature. The rod has a small circular hole near its base. The drawing is a line art representation, typical of technical manuals.

3/4"

The drawing shows a mechanical component, possibly a valve or actuator. It features a cylindrical body with a flange on the left side. A central shaft or rod extends from the right side. The flange has a central circular opening and a smaller, offset circular feature. The shaft has a small circular hole near its base. The drawing is a technical line drawing, showing the component's geometry and assembly details.

The drawing shows a mechanical component, possibly a valve or actuator. It features a cylindrical body with a flange on the left side. A central shaft or rod extends from the right side. The flange has a central circular opening and a smaller, offset circular feature. The shaft has a small, rectangular slot or notch near its base. The drawing is a technical line drawing, showing the component's geometry and assembly details.

3/4"

3/4"

Technical drawing of a mechanical component, likely a valve or actuator. The drawing shows a cross-section of the component, revealing internal features such as a central bore and a threaded section. A side view of the component is also shown, highlighting its cylindrical shape and a small circular feature on the side.

3/4"

The drawing shows a mechanical component with a cylindrical body. On the left, there is a flange with a central circular opening. A small, circular feature, possibly a screw head or a sensor, is located on the side of the flange. The main body of the component has a longitudinal slot or channel on its side. The right end of the component is a smooth, rounded cylinder.
