

An isometric drawing of a mechanical component. It features a large circular opening on the left side. On the top surface, there are two small circular holes. The part has a complex, multi-faceted shape with various edges and surfaces.

An isometric drawing of a mechanical component. It features a large circular face on the left side, which appears to be a flange or a mounting surface. To the right of this circular face is a rectangular block. The block has several features: two small circular holes on its top surface, a larger circular hole on its side, and a rectangular slot on its front face. The drawing is a line drawing with no shading or texture.

An isometric drawing of a mechanical component. It features a central cylindrical bore. On the front face, there are two small circular holes. On the top surface, there are two more small circular holes. The part has a complex, multi-faceted shape with various chamfers and fillets.

An isometric drawing of a mechanical component. It features a large circular opening on the left side. On the top surface, there are two small circular holes. The part has a complex, multi-faceted shape with various edges and surfaces.
