

VDI 40

VDI 40

A technical line drawing of a rectangular component. It features a circular feature on the front face, which appears to be a hole or a recessed area. On the right side, there is a threaded section, possibly a bolt or a screw. The drawing is a perspective view, showing the top, front, and right side of the component.

VDI 40

VDI 40

A technical line drawing of a rectangular electronic component. The component has a front face with a large circular port or connector. On the right side, there is a cylindrical protrusion, likely a connector or a cable. The drawing is a perspective view showing the top, front, and right side of the component.

VDI 40

A technical line drawing of a rectangular electronic component. The component has a front face with a large circular port or connector. On the right side, there is a multi-pin connector, likely a D-sub connector, protruding from the side panel. The drawing is a perspective view showing the top, front, and right side of the component.

VDI 40

VDI 40

VDI 40

A technical line drawing of a rectangular component, likely a valve or actuator. It features a circular port on the front face and a threaded connection on the right side. The drawing is a perspective view showing the top, front, and right sides.
