A technical drawing of a mechanical component, likely a valve or actuator, shown in a cross-section view. The component has a cylindrical base with a flange at the bottom. The upper part is a rectangular block with a central circular opening. There are several small circular features, possibly screws or ports, on the side of the block. The drawing is a line drawing with no shading.

A technical drawing of a mechanical component, likely a valve or actuator, shown in a cross-section view. The component has a cylindrical base with a flange at the bottom. Above the base is a rectangular block with a central circular opening. The block has various mounting points and a small rectangular cutout on its side. The drawing is a line art representation with no shading.

A technical drawing of a mechanical component, likely a valve or actuator, shown in a cross-section view. The component has a cylindrical base with a flange at the bottom. The main body is rectangular with rounded corners and features a central circular opening. There are several small circular features, possibly screws or mounting points, on the side and top surfaces. The drawing is a line art representation with no shading.
