This technical drawing shows a perspective view of a steering knuckle assembly, specifically the ball joint end. The assembly consists of a lower control arm, a steering knuckle, and a ball joint. The ball joint is shown in a retracted position, revealing the internal ball joint housing and the ball joint itself. The lower control arm is attached to the steering knuckle via a ball joint. The steering knuckle has a threaded end for a ball joint. The ball joint is shown in a retracted position, revealing the internal ball joint housing and the ball joint itself.

A technical line drawing of a ball joint. It features a central spherical ball seated within a housing. The housing has a flange with two mounting tabs on one side and a threaded rod extending from the other side. The drawing is a perspective view showing the internal components and the external structure.

10649752

A technical line drawing of a ball joint. It features a cylindrical outer housing with a flange at one end. Inside the housing, a ball is visible, held in place by a cage with four slots. A threaded rod extends from the other end of the housing.

INDEX

10649752

A technical line drawing of a ball joint, showing a spherical ball seated within a housing that has a cross-shaped internal structure. The housing has a flange with two mounting holes. A threaded rod extends from the side of the housing.
