

Technische Merkmale

The image shows a Siemens VL160 thermal relay. It is a black, rectangular device with a silver-colored top section. The top section has four screw terminals for power supply. The main body is black with white text and a silver-colored handle. The handle is currently in the 'ON' position. Below the handle, there is a small window showing the current setting, which is 16 A. To the right of the handle, there is a small window showing the temperature setting, which is 50 °C. Below the handle, there is a small window showing the reset time, which is 10 min. To the right of the handle, there is a small window showing the reset current, which is 16 A. The device is labeled 'VL160' and 'Siemens'. It also has a CE mark and a diagram showing the internal wiring connections.
