

**Streamline Milling Add-On Package
WinFlexIPS / WinFlexIPS^{Plus}**

Streamline Milling Add-On Package with WinFlexIPS/WinFlexIPS^{Plus}

In addition to the Milling Add-On Package, TRAUB offers an additional add-on package for the WinFlexIPS and WinFlexIPS^{Plus} software to optimize their machining processes.

The *Streamline Milling Add-On Package* assists with the NC programming of Torx profiles and with milling using the streamline strategy.

The “Torx Milling Pro” module enables you to create Torx profiles in sizes T6 – T100 using efficient and innovative milling strategies. Helical milling and streamline milling are utilized just as much as contour milling to create the complex Torx contour.

In the “Streamline Milling” module, the surface quality is improved and the tool life is increased by maintaining a constant chip volume. The stepped approach to the ultimate workpiece contour with dynamic feed adjustment while ensuring constant chip removal reduces vibrations and leads to harmonious machining.

The *Streamline Milling Add-On Package* assists you in creating the best possible NC program. By simply entering a few machining parameters, the NC program is created directly on the machine or on a PC workstation effortlessly.

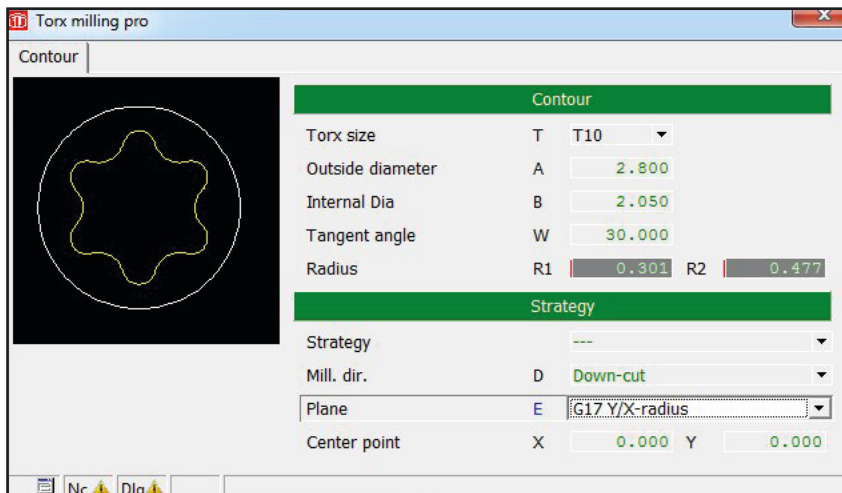

The *Streamline Milling Add-On Package* can be used in the WinFlexIPS and WinFlexIPS^{Plus} software, version 6.11.07 or higher.

If you have further questions about our *Streamline Milling Add-On Package*, don't hesitate to call us at +49 7153 502-548 or send us an e-mail to service@traub.de

The Streamline Milling Add-On Package includes the following features:

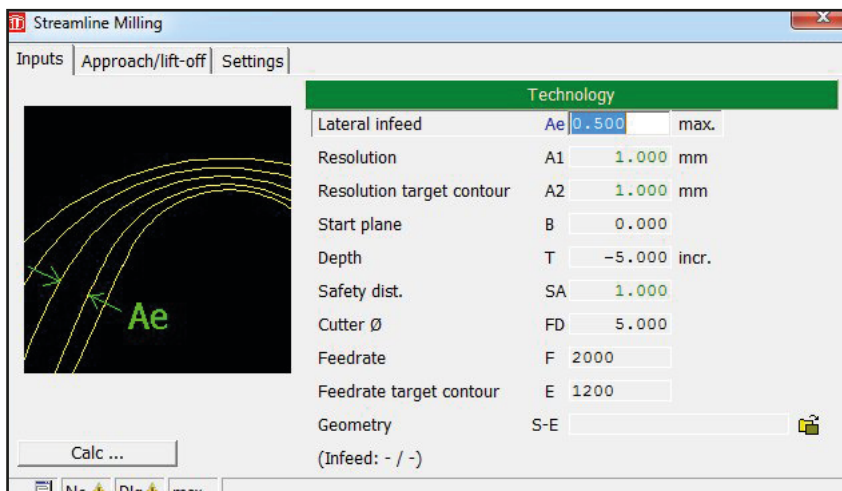

Torx Milling Pro

- Reduced machining times through the use of innovative and efficient milling strategies
- Simple programming on the machine or on a PC workstation

Streamline Milling

- Increased tool life and improved surface quality achieved by constant chip volume and dynamically adjusted feed rate
- Reduced machining times by continuously removing material
- Simple programming on the machine or on a PC workstation
