

Turning and grooving tool holders with internal cooling lubricant supply

Turning and grooving tool holders with internal cooling lubricant supply

With the new turning and grooving tool holders for cutting tools with internal cooling lubricant supply, you increase process reliability and productivity through:

- improved chip control
- longer service lives
- enhanced surface finish

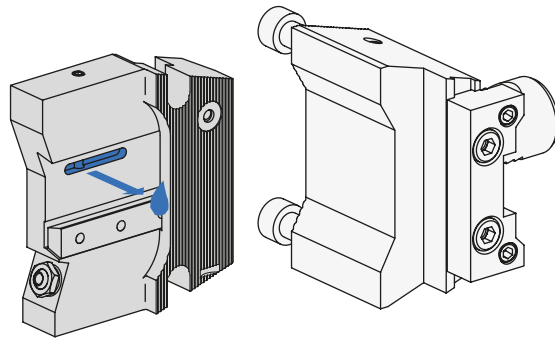

Significant benefits for grooving and cutting off:

- the cutting edge is reached on deep grooves
- increased process reliability by targeted rinsing off the chips from the groove

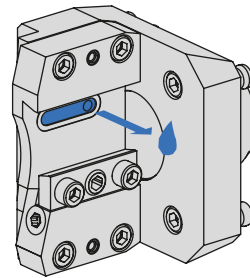

Turning and grooving tool holders for cutting tools with internal cooling lubricant supply no longer require any additional coolant pipes. This eliminates the adjusting of coolant pipes and chip accumulations are avoided.

Of course, this solution can be used up to 120 bar depending on the machine. Available for all common INDEX or TRAUB machines.

Please feel free to contact us if you have any further questions +49 711 3191-9854 or visit us online: ixshop.ixworld.com
