

Cable

Technical data

|                            |                                             |
|----------------------------|---------------------------------------------|
| Electrical assemblies      | Electr. assembly lines                      |
| Length                     | 10000 Millimeter                            |
| Cross-section              | 0.5 Square millimeter • 1 Square millimeter |
| Number of wires/poles (ST) | 19 Piece                                    |
| Voltage                    | 150 Volt                                    |
| Plug connection/type       | M23 (size 1 / encoder)                      |
| Outer diameter (mm)        | 11.6 Millimeter                             |
|                            | BK - black                                  |
| Protection class           | IP65/67 Cab./Con.,Motor/Flan                |
| Shield                     | no - unshielded                             |
| Insulating material        | PUR                                         |
